

30 March 2017

Dear Chuck and Joanne,

On behalf of the sixth graders, I would like to express my thanks to you both for your many hours of preparation and visits to our classroom. The presentations were very helpful, and I hope will be remembered by the students for many years to come. I asked them to write a letter of reflection and thanks to you. Please understand that these papers were not edited or revised. We look forward to your follow up lessons later this year, the Lord willing.

Thanks!

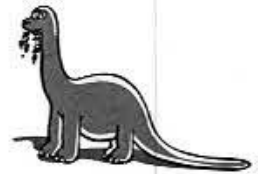

Teacher

Here is what a class of 6<sup>th</sup>  
graders had to say after  
we taught them 10 sessions  
about God's work of creation.

CreationFirst.org

Dear Mr. and Mrs. Bultman,

Thank you for coming to our classroom to teach us about how the Bible is true and evolution is not true. I really thought that what you taught us was super interesting! I really liked it when you taught us about the dinosaurs. I liked how you made everything so fun to learn about. I liked it how you put in Scrat and other characters from Ice Age, The Lord of the Rings and Jurassic Park in your presentations.

It is really cool how you come to Zion and teach us about all of this.

I never knew all that stuff about the ark (like how all the animals could fit in... and stuff). I hope that your surgery goes well and that you'll be able to come back

and teach us again. I think that your two Bible Cannons and your two backpacks are really cool. I learned a lot of things from you that I never knew before you came. I think it's really cool how you have all those fossils that you passed around to us because it makes what you're teaching about seem more real. I can't wait until you peeps come back in the spring!

❖ MORGAN

Dear Bultmins,

Thank you for helping our class on the path of God. Your teaching was inspiring to me. You taught me things that I didn't know about evolution and how they are wrong. This information will help me when I grow up. I will keep you in my prayers. I hope that God will bless you in the rest of the years of your life. I will pray for you and your knee surgery. Thanks for your time spent on teaching us. You are very fun. You will be a great inspiration to the future kids. I will remember you and your teaching. Maybe I will even teach it to others also. Your lessons could change a lot of people. Sorry I missed some of your teaching. I was getting prepared for an expander and braces. I don't like my expander. I hope that you never had one. My favorite lesson was the baseball one. The evolutionists can't prove that evolution is real but they keep on going. "Wherefore, as by one man sin entered into the world, and death by sin; and so death passed upon all men for all men, for all have sinned," Romans 5:12

Sincerely,

Ty

To: Mr. and Mrs. Bultman

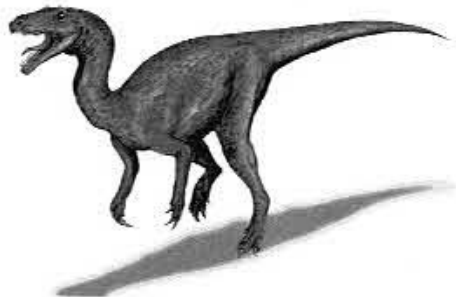

Thank you for helping us with science and helping me understand science and the bible better. I thought it was especially helpful to me because it is a little harder for me to understand most things but your lessons really helped me understand things a lot better. I hope that your surgery went well and that you recovered quickly. The lesson about the ice age helped me now for sure that there really was an ice age because I was going back and forth in my mind trying to figure out if there really was an ice age, but now I now for sure that there was an ice age. It also gives prove that the world isn't millions of years old because it could build up in about 500yrs and melt in about 200yrs. I really enjoyed the power points because it gave me a better visual perspective.

Bible Verse: Genesis 8:1-2

Then God remembered Noah, and every living thing, and all the animals that were with him in the ark. And God made a wind to pass over the earth, and the waters subsided. The fountains of the deep and the windows of heaven were also stopped, and the rain from heaven was restrained.

From: Brandon

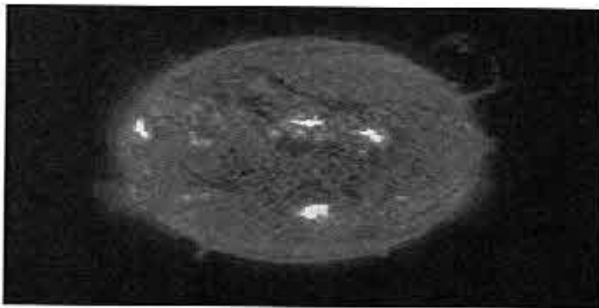

because it was fun to learn about.

I liked it when you taught us about the dinosaurs

It was very fun when you taught us about how the animals could fit on the ark, and what present of the ark was used and what was not used.

When you showed us about how the Earth can only survive with a G2 star

I want you to come back to teach us again about something fun. I liked playing the guessing game on the screen. My favorite one was when you taught us about the ice age. It was interesting when you showed us about the legend of the knight who killed the dragon. I

like when you show us videos about the topic that we were on.

I am glad that you are teaching us how evolution is wrong and that Christians are right. You are helping me so I will know what is right and what is wrong and so I will always believe in Jesus. I hope that you can get better soon so you can teach.

<sup>13</sup> And there is no creature hidden from His sight, but all things *are* naked and open to the eyes of Him to whom we *must give* account.

joel

Dear Mr. and Mrs. Bultman,

Thank You for coming to our classroom to teach us about the Bible. I

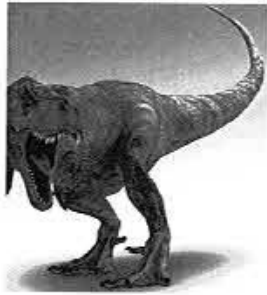

learned that Evolution can NOT disprove the Bible. I enjoyed all of them,

but most of all I enjoyed the talks about the 2 Canons,

The Limitations of Science, The Flood, the Limits to the

age of the earth, and The Bible doesn't support the Big

Bang, and yerrr out on every base! But overall my

Favorite one was The Limits to the Age of the Earth because there was a lot of new things that I didn't know; so I learned a lot. I loved all the Biblical videos & Bible verses you put in your presentations (And the Ice Age and Jurassic Park videos). I like all the visual things you put in your powerpoints; it made me understand what you were teaching a lot better.

I hope your knee surgery goes well and you recover quickly. I learned so many things from you, and I hope you come back in May to teach us some more.

One of my favorite verse you shared with us:

"Wherefore, as by one man sin entered into the world, and death by sin; and so death passed upon all men, for all have sinned."

**ROMANS 5:12**

**SINCERELY,**

**KAITLIN** \_\_\_\_\_

Dear Mr. and Mrs. Bultman,

Thank you for coming to Zion to teach us that evolution can never disprove the Bible. I liked how you put Ice Age stuff in the presentation I was really cool. My favorite lesson was the one on the dinosaurs because I like how you taught us about them. The Ice Age mysteries where very interesting mammoths are so cute!

- ❖ The cause of an Ice Age
- ❖ Mammoth abundance and extinction
- ❖ Lack of mammoth food in Siberia and Alaska
- ❖ Mammoths buried in frozen blow dust
- ❖ Mammoths buried standing up, some suffocated
- ❖ Warm and cold climate animals living together in England
- ❖ Lowlands of Siberia and Alaska not covered by ice

The lesson on the ark was awesome because I did not know that most of the animals where the size of rabbits! The story of the two cannons was very interesting as well. I hope your surgery went well Mr. Bultman!!

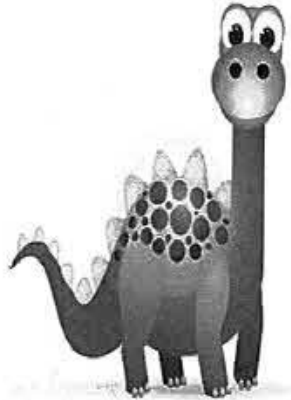

"You alone are the LORD You have made the heavens, The heaven of heavens with all their host, The earth and all that is on it, The seas and all that is in them You give life to all of them And the heavenly host bows down before You. ~Nehemiah 9:6

✦ Anna

anna@zion.org

Dear Mr. and Mrs. Bultman

Thank you for coming to our class to teach us about not to believe in evolution. And follow God no matter what we do. And I really liked the speech about Dinosaurs and learning about them.

I also liked when you put scat in your power point point.

電療院 And I hope that your surgery on your knee goes good. I can't wait for you to come back I hope you talk about scat again.

Where did you get all those props you passed around like the dinosaur teeth and claw or the mammoth hair all those things are really cool I also liked learning about the rocks where do you get all of them did you go to all different states to get them or did you buy them at a store somewhere because there really cool. I also like the books you left about dinosaurs they were really interesting I like learning about the bones and the other things about a dinosaur. I also liked when you brought in the mammoth hair where did you get it I now you bought it but where have you ever seen a real mammoth at a museum or something.

Sincerely Andrew

Dear Mr. and Mrs. Bultman,

Thank you for coming to our class. I am very thankful for you and your presentations. You taught me how to know for sure that the Bible is TRUE!!! All your presentations were very helpful. You taught me many things I did not know. I was very clueless. I believed something I did not know was actually true. But now, I know it is true and I thank you for that. Half the stuff you told me I didn't even know!

I really liked the ice age lesson. It is so amazing to think that Michigan was mostly covered with snow and ice. I also liked the lesson about space. It was really cool that earth was put in the perfect place so that we can discover and live. The nebulas blew my mind!

I hope your surgery went well. Get well soon!

You are super fun to listen to and you also introduced me to my new favorite fruit, STARFRUIT!!!!!!

What you taught me will stay with me the rest of my life.

Question: How do you make your power-points?

I look forward to seeing you again soon! God Bless You!!

Love, Brieanna Alquist

**Thank you Mr. and Mrs. Bultman, for teaching our class! I learned that it is hard for people that are in collage to stick to their faith. I enjoyed the Ice Age movie clips.**

**I also really enjoyed the lesson on**

**Up to bat: Origin of the universe**

**1<sup>st</sup> Base: Origin of life**

**2<sup>nd</sup> Base: Origin of information in cells**

**3<sup>rd</sup> Base: Origin of DNA's 4 dimensional structure**

**Home Plate: Fossil record**

**I never really thought about dinosaurs/dragons the lesson on dinosaurs really helped me understand more about them that is also what I enjoyed.**

**"Look now at the behemoth, which I made along with you; He eats grass like an ox." JOB 40:15**

**I like the things that were passed around because I am more of a visual person. I really appreciated all the work you put into the power point. I also really liked the optical illusions.**

**I hope your knee surgery goes well, I hope you get well soon!**

**"Do you not know? Have you not heard? The Lord is the everlasting God, He will not grow tired or weary, and His understanding no one can fathom." Isaiah 40: 28**

**Thank you, Mr. and Mrs. Bultman**

**Sincerely, Allison**

To Mr. and Mrs. Bultman,

Thank you for helping me with biblical teachings. I hope your surgery goes well and I hope to see you in May after you recover from your knee surgery. Thank you for reminding me about all the bible history and that science is wrong (evolution). I really was surprised when you said that the average animal on the ark was a bunny and that 31 percent was empty. I really thought it was crazy that a diamond that was claimed to be 1.5 billion years old and when they did the carbon-14 it was 50,000 years old. It's good to know that you can get the evolutionist out on every base and that they just keep running and making good but actually bad excuses so then we always get them out. I am very glad that you come every Tuesday and Thursday, and remind us about the scriptures and that the bible does not like or support big bang.

From Nathan

Romans 15:4

For everything that was written in the past was written to teach us, so that through the endurance taught in the Scriptures and the encouragement they provide we might have hope.

Dear Mr. and Mrs. Bultman,

Thank you teaching me about that God's Word is true from the beginning. I liked it when you taught us that God designed us with just the right size of body, big enough to have features that we can use to observe His creation and that we can use to worship Him. Features such as big, "sharp" eyes, a brain that's big enough to have abstract thoughts and awareness of the universe. He put us at just the right place in the universe, by the right type of star, the right size of the planet, right size of moon, that earth has a magnetic field, water, oxygen, so that we could be great worshipers of Him. And teaching me that the evolutionists' idea that the earth is 1.4 billion years old is wrong, because the earth has to be younger than 1300 million years old because the moon would have been crushed by earth's gravity, 700 million years old because the spiral galaxies' arms would be wound up by now, 62 million years because the ocean would be saltier than it is today, 12 million years or there would be much thicker mud on the bottom of the ocean than there is today, and 1/10 million years or the layers of coal would have no more Carbon 14 in them. It also has to be younger than 10 thousand years because there's short period comets still existing today, too low amount of uranium in the ocean water, too few stone age graves for the world being supposedly being 1.4 billion years old.

"Wherefore, as by one man sin entered into the world, and death by sin; and so death passed upon all men, for all have sinned." Romans 5:12

Sincerely, Michael

Dear Mr. and Mrs. Bultman thank you for coming and teaching us  
About noah and how he had to fit two of every kind and that there is  
only about 8,000 diferent kinds that he could maybe fit on the ark.

- I loved learned about the ice age, and about the mammoths.
- I have always wanted to know how old the eath really is and then you helped me know how old the earth really is.
- I also liked when you taught us about dinosauresand you passed around the dinosaure foot print it was very cool.
- Thank you for showing us all the videos on the ice age and
- Thank you for also showing us the buterfly nebula it was Very cool.
- I really enjoyed every thing that you taught us
- I hope that Surgery went well mr.bultman

Job

- 41 <sup>[A]</sup> "Can you pull in Leviathan with a fishhook  
or tie down its tongue with a rope?  
<sup>2</sup> Can you put a cord through its nose  
or pierce its jaw with a hook?  
<sup>3</sup> Will it keep begging you for mercy?  
Will it speak to you with gentle words?  
<sup>4</sup> Will it make an agreement with you  
for you to take it as your slave for life?  
<sup>5</sup> Can you make a pet of it like a bird  
or put it on a leash for the young women in your house?"

Sincerely Brooke \_\_\_\_\_

Dear Bultmans,

Thank you for teaching us about disproving evolution so that we can stand against anyone trying to persuade us into believing evolution. Thank you for teaching us about the ice age and that it wasn't millions of years ago. Thank you for bringing dinosaur poop, it was cool. "As you hold firmly to the word of life, and then I will be able to boast on the day of Christ that I did not run or labor in vain;" Phillipians 2:16. "Be strong and courageous. Do not be afraid nor terrified because of them, for the Lord your God goes with you; He will never leave you nor forsake you." Deuteronomy 31:6 "Keep this Book of the Law always on your lips; meditate on it day and night so that you may be careful to do everything written in it. Then you will be prosperous and successful. Joshua 1:8. I really hope your knee feels better and that you might be able to come back and talk to us again. Thank you for coming to teach us in Christ and that we might be able to help other people and possibly preach in churches. P.S I really liked the game with the remotes.

Alex

Dear Mr. and Mrs. Bultman,

Thank you for coming to our class to teach us about Gods Word and this world that we live on. I hope that your surgery goes well and that you are able to recover well and can come back to teach me and my class. Thank you for giving us cards to remember your sessions by. Thank you for giving us the two cannons so we can defend our faith if it is ever challenged by an evolutionist. Thank you for telling us how to point out how evolution is wrong and the Christian faith is true. I also liked it when you told us how all the animals fit onto the ark and how there was still room for food and water on the ark. I liked it when you told us how the ice age because I have always wondered if it actually happened and how it was caused. Thank you also for telling us the limitations of science and how scientists cannot prove historical events and it does not get any final answers and it is always changing. Thank you for telling us that the Bible does not support the big bang. I plan on keeping the cards that you gave us forever or at least as long as I can.

Your student, Micah

Dear Mr. and Mrs. Bultman,

You guys helped me so much with God making wonderful things He created. Also thanks to you for teaching me if our world was moved to a different spot in the galaxy and the gravity was changed our world won't have any life in it. Also if our world didn't have a moon and had the wrong kind of sun or star once again, no life. Same thing with our body one little change, we won't be living. You taught me that God has made everything so accurately, thank you for that. That helped me so much. He is truly awesome. By the way, I tried the experiment with the blowing up pop bottle. You put dry ice in with water and the pressure is so big it can explode! I'm never trying that again!

You also taught me the Flood made the Ice Age. Thank you so much for all of this, these really helped me and I will see you soon!

"The Lord is my strength and my shield; my heart trusts in Him,

And he helps me. My heart leaps for joy, and with my song

I praise Him.

*Psalm 28: 7*

*Sincerely,*

*Ethan* \_\_\_\_\_

Dear Mr. and Mrs. Bultman,

Thank you for coming to our class! The presentations were awesome! I really liked the fossils and rocks you guys brought in. Thank-you for all the effort you put into everything! My favorite presentation was about the Ice Age. I learned a lot from the presentation. I learned lots of stuff that I had never learned before. I think that it was really cool that you passed around all the fossils, (not to mention the dinosaur poop☺). It was really fun learning about the mammoth. I liked reading the Bible verses and figuring out the questions you asked us. I really liked seeing the old mammoth hair that you guys passed around! Thank you for taking the time to come to our classroom and teach us your presentations. I liked that you put other characters from movies into your presentations! I hope your surgery went well Mr. Bultman!

~Riley

**PSALM 96: 1-3 NKJV**

Oh, sing to the LORD a new song!

Sing to the LORD, all the earth.

Sing to the LORD, bless His name;

proclaim the good news of His salvation from day to day!

<sup>3</sup> Declare His glory among the nations,

His wonders among all peoples!

Thank you Mr. and Mrs. Bultman, for coming and teaching to our class this year!  
I enjoyed all the things you passed around and the pictures that you put so much  
time into, on the power point.

- I liked how you showed us the space of the ark how much was empty, how much was water, food, and the animal and cages. Because it makes it a lot more believable. Most the time we hear that there is no way how all the animals could fit in the ark, but we only need to have two of its kind as the bible says. *"So God created great sea creatures and every living thing that moves, with witch the waters abounded, according to their **KIND**, and every winged bird according to its **KIND**. And God saw that it was good."* Genesis 1:21

- I also liked the videos and pictures of the ice age.

- I liked the lesson about the baseball evolutionist, and how many times they were out. I have learned that evolution is way less believable than what the bible teaches.

The optical illusions were really awesome and I enjoyed them!!!!!!!!!!!!!!!!!!!!

I hope your Knee surgery went well, and that you will recover soon.

Sincerely, Emily

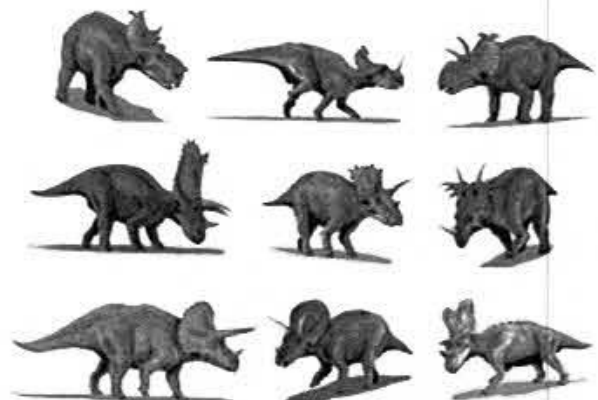

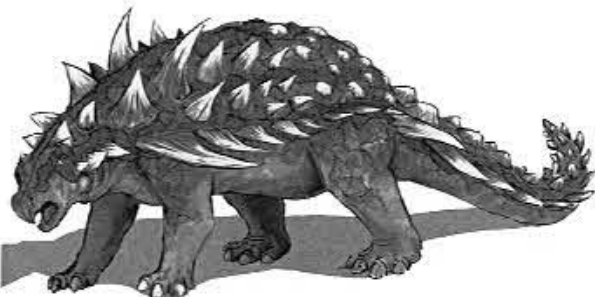

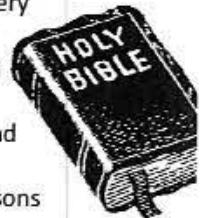

# ICE AGE

Dear Mrs. and Mr. Bultman,

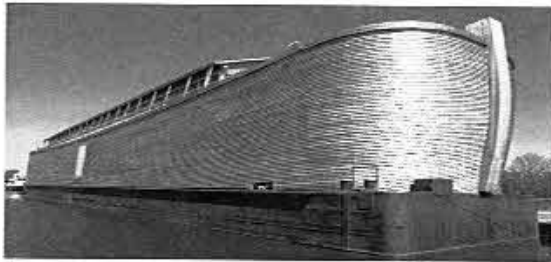

Thank you for the wonderful presentations that you gave to us. I especially enjoyed the Ice Age one that you told us about. I liked to see the mammoth hair and how they went extinct. Your presentations helped me understand that evolution is not true and how to stand up against it and its evil ways. I loved to see the cool dinosaur bones that you brought in, and even let us hold them! It was very interesting to see the ancient things that showed that dinosaurs really did exist! From one of your very first lessons you gave you had taught me so much; how the flood came, how fossils are created, and even what animals were on the ark. I have to say though, that my favorite lesson was The Ice Age and the interesting facts about the wildlife back then and also when it happened. Throughout all the lessons you have helped me to realize that I need to be prepared for when I will be challenged in life, while making me laugh along the way!! I hope your knee surgery goes well and I am excited to have you back to teach us some more in a few months.

~JOSIE

Mr. and Mrs. Bultman,

Thank you for coming to Zion Christian School and teaching my class! I found your life story very interesting, and memorable. You have been to so many amazing places, and you've probably told so many people about God, and so I like to hear about it. I really hope that your surgery goes well, and I

hope that afterwards you can still teach kids, because I think you are a very good teacher.

Evolutionists say that they think logically, but you showed us that really Christianity is the most logical of all theories. My favorite lesson was probably the one where it showed that all animals could fit in the ark. I hope you come back to teach again this year, because I enjoyed hearing from you.

I found that the lesson about baseball or whatever was helpful, because it showed that it was just a false theory people can't let go of, and they don't want to let go of it because that would be admitting there was a God.

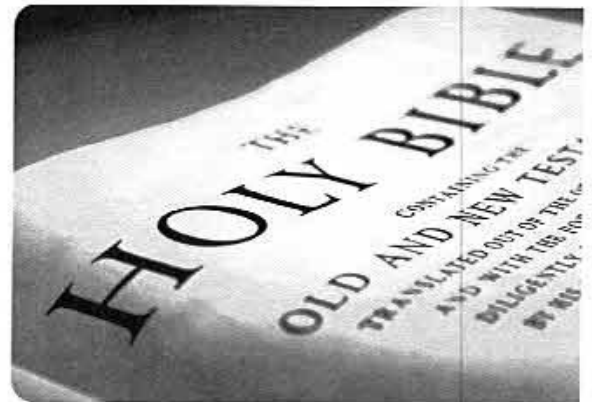

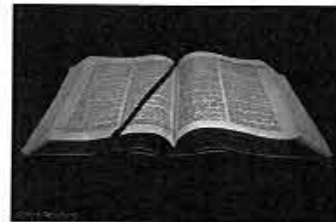

Also before I forget, my favorite verse that you showed us was this:

"Wherefore, as by one man sin entered into the world, and death by sin; and so death passed upon all men, for all have sinned."

Romans 5:12

Anyway, thank you coming to Zion Christian!

Alayna

Dear Mr. and Mrs. Bultman

Thank you for teaching me for guarding my mind in the first session and for teaching me not to believe evolution. And also thanks for teaching me about cannon two and for proving that the flood is real. Thanks for bring up the question how did all the animals fit in the ark? When people make it look like the average animal size is like a rhino or a tiger but actually the average animal size is a bunny rabbit so actually a lot of animals can fit in the ark, and you proved that two hundred and seventy stock cars can fit in the ark

Thank you for teaching me that the world is not billions of years old but actually the world is like six thousand years old. Also thank you for teaching me that after the flood came an ice age that killed the mammoths and that there will never be another ice age first because there will never be another flood and there will never be warm winters and there won't be cold summers

Genesis 7:4 for after seven more days, I will send rain on the earth forty days and forty nights and I will blot out from the face of the land every living thing that I have made

Sincerely Ethan
